ENRICO AUGUSTO ALAGAO

Data Professional | Analytics, BI & Data Engineering
Iloilo City, Philippines | 0929 281 9191 | enricoalagao@gmail.com | Portfolio: enrico1551.github.io

PROFESSIONAL SUMMARY

Data professional with 2 years of experience working with operational data to support reporting, performance monitoring, and business decisions. Skilled in SQL and Python for data cleaning, transformation, validation, and exploratory analysis, with hands-on experience using Databricks, Snowflake, and Apache Superset. Combines data preparation and modeling with KPI reporting, trend analysis, and clear communication of findings to non-technical stakeholders.

TECHNICAL SKILLS

Languages: SQL (PostgreSQL, Spark SQL), Python (Pandas, NumPy), C# (foundational)

Data Preparation & Engineering: Data cleaning and transformation, data validation and quality checks, dataset preparation for reporting, Databricks, Snowflake, Spark SQL

Analytics: Exploratory data analysis, trend analysis, statistical analysis, Matplotlib, Seaborn, Scikit-learn (regression, classification, model evaluation)

Business Intelligence: Apache Superset, dashboard development, KPI definition and tracking, stakeholder reporting

Business Analysis: Requirements gathering, stakeholder communication, business insight generation, recommendation-focused reporting

Tools: Jupyter Notebook, Databricks Notebooks, Excel, Power BI

PROFESSIONAL EXPERIENCE

MeldCX Philippines | Data Scientist *Aug 2024 - Oct 2026*

- Developed dashboards and reports in Apache Superset to support stakeholder reporting, improve KPI visibility, and help teams review business trends.
- Cleaned, transformed, and validated operational datasets using SQL, Python, and Spark SQL across Databricks and Snowflake, preparing more reliable data for analysis and reporting.
- Conducted exploratory and trend analysis on operational datasets to identify patterns and generate insights for planning, performance monitoring, and process review.
- Communicated dashboard findings and technical results to non-technical stakeholders, translating data into clear takeaways and next steps.

Kabertek Inc. | Student Intern*Feb 2023 - May 2023*

- Validated and encoded information according to data-handling guidelines, maintaining data integrity and confidentiality.
- Supported enterprise system updates using C# and MVC.

PROJECTS

- Loan Data Analysis (Work sample): Analyzed 18,782 loan outcomes, with a 91.3% approval rate and PHP 906.3M in approved loans. Recommended monitoring demand spikes, cancellations, and branch-level approval patterns to support lending decisions.
- Komunitree Analytics Dashboard (Work sample): Built a dashboard combining map context, ranked entities, category mix, timelines, and detail tables. Recommended using map clusters and record-level drill-downs to prioritize validation and follow-up.
- Starbucks Station Performance (Work sample): Analyzed station utilization and identified Espresso as the most utilized station. Recommended monitoring peak periods and balancing support around high-use stations.

CERTIFICATIONS AND EDUCATION

- **Associate Data Analyst in SQL**, DataCamp, 2026
- **Python for Machine Learning & Data Science Masterclass**, Pierian Data (Udemy), June 2023
- **Bachelor of Science in Information Technology**, Iloilo Science and Technology University, 2019 - 2023
